Etobicoke, ON | +1 (437) 995-1560 | [Navdeep Singh](#) | [Website](#) | [Linkedin](#) | [Github](#)

PROFESSIONAL SUMMARY

Front-end developer and design engineer building responsive web apps, client websites, and practical business tools with Next.js, React, TypeScript, Tailwind CSS, and modern UI systems. The portfolio includes live client work, invoice software, dashboard-style products, UI components, and full-stack learning projects. Also brings 4+ years of Walmart Canada store experience as a Meats Associate, with strong customer service, operational reliability, attention to detail, and daily problem-solving in a fast-paced retail environment.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, shadcn/ui, responsive design, accessibility, motion/animations

Design + UI: Figma, landing pages, design systems, reusable components, visual polish, spacing, typography, layout, product thinking

Full-stack + Tools: Node.js basics, REST APIs, MongoDB, PostgreSQL/SQL, Convex, Firebase, Git, GitHub, Vercel, Microsoft Office, Excel

FREELANCE EXPERIENCE

Frontend Developer / Design Engineer | Freelance & Client Work 2024 - Present

Toronto, ON

- Designed and developed client-facing websites and landing pages with Next.js/React, focusing on responsive layouts, clean component structure, strong visual hierarchy, and mobile-first execution.
- Delivered CableLink Solutions website ([cablelinksolutions.ca](#)), translating business requirements into branded pages, clear navigation, service presentation, contact flow, and production deployment.
- Built polished UI sections, reusable components, portfolio pages, and project case studies to demonstrate frontend execution, interaction design, and practical problem-solving.
- Handled project work end-to-end: requirement clarification, design direction, frontend implementation, debugging, deployment, and iteration based on feedback.

SELECTED PROJECTS

Personal Portfolio + UI Work | [Navdeepsingh.dev](#)

- Created a developer portfolio to present projects, case studies, UI components, frontend experiments, and client work in a clear recruiter/client-friendly format.
- Built reusable landing page sections and component blocks that show design-engineer strengths: spacing, typography, responsive behavior, visual hierarchy, and clean code.

CableLink Solutions - Client Full-Stack Website | [Link](#)

- Developed a client website for CableLink Solutions with responsive pages, branded service presentation, clear navigation, contact flow, and production deployment.
- Handled the full project workflow from requirements and page structure to frontend implementation, debugging, content polish, deployment, and client-ready delivery.

Invoicely - Modern Invoice Builder | [Link](#)

- Built a responsive invoice-generation web app with dynamic form fields, invoice preview, totals, client/item organization, and a clean document-style interface.
- Focused on real product details including form state, layout consistency, reusable UI, data accuracy, export-ready screens, and a polished user experience.

PROFESSIONAL EXPERIENCE

Meats Associate | Walmart Canada Sept 2021 - Present

Etobicoke, ON

- Built 4+ years of Walmart store experience in a high-volume retail environment, supporting customer service, department standards, product handling, stocking, and daily operational priorities.
- Maintained department readiness through shelf organization, replenishment support, product rotation awareness, quality checks, cleanliness, and fast response to customer needs.
- Solved daily floor-level problems by prioritizing work, communicating with team members and leaders, handling customer questions, and adapting to changing store demands.
- Developed strong reliability, attention to detail, and understanding of how execution affects availability, customer experience, shrink/waste, and team workflow.

EDUCATION

Diploma in Computer Programming | Humber College Institute of Technology & Advanced Learning Jan 2024 - Sept 2025

Toronto, ON

- Relevant focus: programming fundamentals, web development, databases, SQL, software testing, systems analysis, technical documentation, and structured problem solving.
